

Our Children's Future Is In Our Hands Stop Global Warming Mother's Day Gift of Hands Across New Mexico

Join 5,000 mothers, grandmothers, aunts, sisters, neighbors in a gift of life for Mother's Day.

Draw an outline of your hand and that of your child or another child that expresses, "I care about you, my child. I care about the earth. I care about the future."

This is the first in a series of actions across the country and in New Mexico led by 1Sky and Interfaith Power and Light. Each action invites people to express their deepest values in a declaration of support for solutions to Global Warming.

Why now?

Global warming is a moral and ethical imperative of our time. We can stop global warming, we have solutions but lack the political will and leadership. It is time to act with a sense of urgency and to show community leaders that citizens want change, we want bold, creative, and courageous leadership to stop global warming.

What will happen with the drawing?

The drawings from across the state will be collected and become part of an art display that will travel throughout New Mexico to churches, schools, and other events to inspire, educate and take action to stop global warming.

What do I need to do?

1. Draw the outline of your hand on the back of this sheet of paper.
2. Draw the outline of the hand of a child you love or one that you do not know within your hand outline (the child can be from anywhere)
3. Write your names and, if you feel moved add a short message of care.
4. Fill out the information listed including name, address, phone, email.
5. Mail to: 1SKY New Mexico, 1522 Cerro Gordo Rd, Santa Fe, NM 87501
- 6. Invite 5 people to do the same.**
- 7. Do this by April 21.**
